## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see page 2 of Amendment A, filed March 23, 2004, with respect to specification informalities have been fully considered and are persuasive. On consideration of the inserted definition for "gray component density", it is illustrated in Figure 2 and thus does not constitute new matter. The objections to the specification have been withdrawn.

Applicant's arguments, see page 3 of Amendment A, filed March 23, 2004, with respect to the claim amendment have been fully considered and are persuasive. It has been determined that no new matter has been entered as a result of the changes.

Applicant's arguments, see page 8 of Amendment A, filed March 23, 2004, with respect to drawing designation have been fully considered and are persuasive. The objection to Figure 1 has been withdrawn.

### ***Allowable Subject Matter***

The following is an examiner's statement of reasons for allowance: claims 1-6 are allowed over the prior art, which does not describe, disclose or suggest an arrangement whereby a black generation value is calculated, wherein this value is 100% if the gray component value is below a first threshold and constant above a second threshold, whereby the thresholds are determined by an intensity value of light black ink relative to

standard black ink, as is essential to the independent claim 1, and thus all its dependent claims (claims 2-6).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
